Sheridan

Welcome CST ITIS students to the Fall 2021 semester!

These are still trying times, but the remote teaching approach has matured such that many new learning techniques will continue to be used after a return to full time face to face lectures and labs.

With a 15-week semester which includes a break week, your professors will most likely hold mid term tests prior to the break and final exams the last week of class. Please confirm all test dates with each of your professors.

The world of IT, computer hardware and software are moving forward at a dizzying pace. Your professors will teach skills and material preparing you for the working world upon graduation.

However, one skill that is required of you is reading ... reading, reading ,reading ... please read all your course instructions carefully to eliminate problems with course deliverables and check with your professors if they are not clear to you.

As this is a mobile course, a PC with 16GB of RAM and at least 4 cores CPU is required including Windows 10 Pro (not Home). The business edition of Windows is what is essential to join a domain and support features such as Hyper-V.

I and Maninder Tatla (Academic Advisor) are always available to advise and suggest means and ways to navigate your program so reach out as appropriate, always include your student #, the course and section and a Subject in your email.

I wish you all the best for the Fall.

Stay safe and stay well.

Regards,

Peter Wheeler
Program Coordinator CSTITIS
FAST Applied Computing
